Management is responsible for the preparation and presentation of these interim financial statements in accordance with accounting and reporting standards as applicable in Pakistan for interim financial reporting. Our responsibility is to express a conclusion on these financial statements based on our review.

## Scope of Review

We conducted our review in accordance with International Standards on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditors of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements is not prepared, in all material respects, in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting.

## Other matter

The figures of the condensed interim unconsolidated statement of profit or loss and condensed interim unconsolidated statement of comprehensive income for the three months period ended 31 December 2019 and 31 December 2018, have not been reviewed and we do not express a conclusion on them.

## 3 ACCOUNTING POLICIES AND ESTIMATES

### 3.1 Significant accounting policies

The accounting policies and the methods of computation adopted in the preparation of these condensed interim unconsolidated financial statements are the same as those applied in the preparation of the financial statements of the Company for the year ended 30 June 2019, except for the adoption of new standards and interpretations as referred to in note 3.2 to these condensed interim unconsolidated financial statements.

## 3.2 New standards, interpretations and amendments adopted by the Company

### (a) IFRS 16 'Leases'

The Company has initially applied IFRS 16 'Leases' from 01 July 2019.

IFRS 16 introduced a single, on-balance sheet lease accounting model for lessees. As a result, the Company, as a lessee has recognised right of use assets representing its right to use the underlying assets and lease liabilities representing its obligation to make lease payments.

IFRS 16 replaced previous leases guidance, including IAS 17 'Leases', IFRIC 4 'Determining whether an Arrangement contains a Lease', SIC 15 'Operating Leases – Incentives' and SIC 27 'Evaluating the Substance of Transactions Involving the Legal Form of a Lease'.

The Company applied IFRS 16 using the modified retrospective approach, under which the Company has recognized right of use assets and lease liabilities at the date of initial recognition for leases previously classified as operating leases under IAS 17 at the present value of the remaining lease payments using the Company's weighted average incremental borrowing rate at the initial application date. The Company has chosen to measure the right of use assets at an amount equal to the lease liabilities adjusted by the amount of prepaid lease payments relating to the operating leases recognized in the statement of financial position as at 01 July 2019. Accordingly, no adjustment to equity has been made in these financial statements on adoption of the new policy and the comparative figures presented for 2018 have not been restated, i.e., it is presented, as previously reported, under IAS 17 and related interpretations.

Previously, the Company determined at contract inception whether an arrangement was or contained a lease under IFRIC 4 Determining Whether an Arrangement contains a Lease. The Company now assesses whether a contract is, or contains a lease based on the new definition of a lease. Under IFRS 16, a contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- The contract involves the use of an identified asset - this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset;
- The Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- The Company has the right to direct the use of the asset. The Company has this right when it has the decision - making rights that are most relevant to changing how and for what purpose the asset is used.

On transition to IFRS 16, the Company has elected to apply the practical expedient to grandfather the assessment of which contracts or arrangements are leases, i.e., it applies IFRS 16 only to contracts that were previously identified as leases under IAS 17 and related interpretations. Contracts that were not previously identified as leases were not reassessed. As a result, the definition of lease under IFRS 16 would only be applied to contracts or arrangements entered into or changed after 01 July 2019, to be accounted for accordingly. Additionally, the Company has applied the following practical expedients:

- The use of a single discount rate to a portfolio of leases with reasonably similar risk characteristics.
- Applied the exemption not to recognize the right of use assets and lease liabilities of low value items and leases having a term of less than 12 months i.e., short term leases.

# Notes to the Condensed Interim Unconsolidated Financial Statements (Unaudited)

For the six months period ended 31 December 2019

The Company has contracts for right to use of lands for hotel construction and spaces for normal course of operations along with it's corporate office space, for a specific period of time in exchange of consideration.

Previously, the Company classified leases as an operating lease and a finance lease based on an assessment whether substantial risk and rewards of ownership has been transferred to the Company. Under IFRS 16, the Company has recognized right of use assets and lease liabilities for lease contracts, which were previously not presented on the statement of financial position.

Right of use assets are initially recognized at an amount equal to the amount of lease liability at initial recognition of the lease contract and subsequently depreciated on a straight line method over the term of the lease contract.

Lease liabilities are initially recognized at the present value of the remaining lease payments and are subsequently carried at their amortized cost using the effective interest method.

The Company has applied an incremental borrowing rate of 11.69% on transition to IFRS 16.

## Impact on Transition

On transition to IFRS 16, the Company recognized additional right of use assets and additional lease liabilities, presented on the statement of financial position. The right of use assets are recognized at an amount equal to the lease liabilities, adjusted by the prepaid lease payments pertaining to such lease contracts recognized in the statement of financial position of the Company at initial application date.

	01 July 2019 Rs. '000'
<b>The impact of transition is detailed below:</b>	
Right of use assets recognized on the statement of financial position	302,424
Lease liabilities recognized on the statement of financial position	292,267
Prepaid lease payments amounting to Rs. 10.158 million have been reclassified as right of use assets at initial application date.	

## Impact for the period

	Rs. '000'

## (b) IFRIC 23 'Uncertainty over income tax treatments'

The Company has adopted IFRIC 23 'Uncertainty over income tax treatments' with a date of initial application of 01 July 2019. IFRIC 23 clarifies the accounting for income tax treatments that have yet to be accepted by tax authorities, whilst also aiming to enhance transparency. However, it has no significant impact on the Company's financial statements.

## 3.3 Accounting estimates and judgments

In preparing these condensed interim unconsolidated financial statements, management has made judgments and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements, except for the new significant judgments related to the application of IFRS 16, which are detailed in note 3.2(a) to these condensed interim financial statements.

### Measurement of fair values

The Company has an established control framework with respect to the measurement of fair values. This includes a finance team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the management.

Finance team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the finance team assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which the valuations should be classified.

# Notes to the Condensed Interim Unconsolidated Financial Statements (Unaudited)

For the six months period ended 31 December 2019

Significant valuation issues are reported to the Board.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

### 3.4 Standards, interpretations and amendments to approved accounting and reporting standards that are not yet effective

The following International Financial Reporting Standards (IFRS Standards) as notified under the Companies Act, 2017 and the amendments and interpretations thereto will be effective for accounting periods beginning on or after 01 January 2020 :

- Amendments to IFRS 3: Business Combinations	[effective 01 January 2020]
- Amendments to IAS 1: Presentation of Financial Statements	[effective 01 January 2020]

## 3 ACCOUNTING POLICIES AND ESTIMATES

### 3.1 Significant accounting policies

The accounting policies and the methods of computation adopted in the preparation of these condensed interim consolidated financial statements are the same as those applied in the preparation of the financial statements of the Group for the year ended 30 June 2019, except for the adoption of new standards and interpretations as referred to in note 3.2 to these condensed interim consolidated financial statements.

### 3.2 New standards, interpretations and amendments adopted by the Group

#### [a] IFRS 16 'Leases'

The Group has initially applied IFRS 16 'Leases' from 01 July 2019.

IFRS 16 introduced a single, on-balance sheet lease accounting model for lessees. As a result, the Group, as a lessee has recognised right of use assets representing its right to use the underlying assets and lease liabilities representing its obligation to make lease payments.

IFRS 16 replaced previous leases guidance, including IAS 17 'Leases', IFRIC 4 'Determining whether an Arrangement contains a Lease', SIC 15 'Operating Leases – Incentives' and SIC 27 'Evaluating the Substance of Transactions Involving the Legal Form of a Lease'.

The Group applied IFRS 16 using the modified retrospective approach, under which the Group has recognized right of use assets and lease liabilities at the date of initial recognition for leases previously classified as operating leases under IAS 17 at the present value of the remaining lease payments using the Group's weighted average incremental borrowing rate at the initial application date. The Group has chosen to measure the right of use assets at an amount equal to the lease liabilities adjusted by the amount of prepaid lease payments relating to the operating leases recognized in the statement of financial position as at 01 July 2019. Accordingly, no adjustment to equity has been made in these financial statements on adoption of the new policy and the comparative figures presented for 2018 have not been restated, i.e., it is presented, as previously reported, under IAS 17 and related interpretations.

Previously, the Group determined at contract inception whether an arrangement was or contained a lease under IFRIC 4 Determining Whether an Arrangement contains a Lease. The Group now assesses whether a contract is, or contains a lease based on the new definition of a lease. Under IFRS 16, a contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- The contract involves the use of an identified asset - this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset;
- The Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- The Group has the right to direct the use of the asset. The Group has this right when it has the decision - making rights that are most relevant to changing how and for what purpose the asset is used.

On transition to IFRS 16, the Group has elected to apply the practical expedient to grandfather the assessment of which contracts or arrangements are leases, i.e., it applies IFRS 16 only to contracts that were previously identified as leases under IAS 17 and related interpretations. Contracts that were not previously identified as leases were not reassessed. As a result, the definition of lease under IFRS 16 would only be applied to contracts or arrangements entered into or changed after 01 July 2019, to be accounted for accordingly. Additionally, the Group has applied the following practical expedients:

# Notes to the Condensed Interim Consolidated Financial Statements (Unaudited)

For the six months period ended 31 December 2019

- The use of a single discount rate to a portfolio of leases with reasonably similar risk characteristics.
- Applied the exemption not to recognize the right of use assets and lease liabilities of low value items and leases having a term of less than 12 months i.e., short term leases.

The Group has contracts for right to use of lands for hotel construction and for normal course of operations along with it's corporate office space, for a specific period of time in exchange of consideration.

Previously, the Group classified leases as an operating lease and a finance lease based on an assessment whether substantial risk and rewards of ownership has been transferred to the Group. Under IFRS 16, the Group has recognized right of use assets and lease liabilities for lease contracts, which were previously not presented on the statement of financial position.

Right of use assets are initially recognized at an amount equal to the amount of lease liability at initial recognition of the lease contract and subsequently depreciated on a straight line method over the term of the lease contract.

Lease liabilities are initially recognized at the present value of the remaining lease payments and are subsequently carried at their amortized cost using the effective interest method.

The Group has used an incremental borrowing rate of 11.69% on transition to IFRS 16.

## Impact on Transition

On transition to IFRS 16, the Group recognized additional right of use assets and additional lease liabilities, presented on the statement of financial position. The right of use assets are recognized at an amount equal to the lease liabilities, adjusted by the prepaid lease payments pertaining to such lease contracts recognized in the statement of financial position at initial application date.

<b>The impact of transition is as below:</b>	01 July 2019 Rs. '000'
Right-of-use assets presented on the statement of financial position	302,424
Lease liabilities presented on the statement of financial position	292,267

Prepaid lease payments amounting to Rs. 10.158 million have been reclassified as right of use assets at initial application date.

## Impact for the period

In relation to adoption of IFRS 16, the Group recognized depreciation on right of use assets and interest on lease liabilities in the condensed interim consolidated statement of profit or loss and deducted lease contractual payments from lease liability during the six months period ended 31 December 2019, as presented below:

	Rs. '000'
Depreciation expense	39,826
Interest cost	11,578
Lease payments	27,974

Had IFRS 16 not been applied, the impact on condensed interim consolidated statement of profit or loss of the Group for the six months period ended 31 December 2019 would have been as follows:

# Notes to the Condensed Interim Consolidated Financial Statements (Unaudited)

For the six months period ended 31 December 2019

	Rs. '000'
Increase in rental expenses	40,121
Decrease in depreciation expenses	(39,826)
Decrease in interest cost	(11,578)
Increase in Profit	(11,283)

Reconciliation of amount presented on statement of Financial Statement:

	Right of use assets	Lease liabilities
	Rs. '000'	
Recognized on 01 July 2019	302,424	292,267
Depreciation expense for the period	(39,826)	-
Interest on lease liabilities	-	11,578
Lease payments made during the period	-	(39,552)
	262,598	264,293

**[b] IFRIC 23 'Uncertainty over income tax treatments'**

The Group has adopted IFRIC 23 'Uncertainty over income tax treatments' with a date of initial application of 01 July 2019. IFRIC 23 clarifies the accounting for income tax treatments that have yet to be accepted by tax authorities, whilst also aiming to enhance transparency. However, it has no significant impact on the Group's financial statements.

**3.3 Accounting Estimates and Judgements**

In preparing these interim consolidated financial statements, management has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements, except for the new significant judgments related to the application of IFRS 16, which are detailed in note 3.2(a) to these condensed interim financial statements.

**Measurement of fair values**

The Group has an established control framework with respect to the measurement of fair values. This includes a finance team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the management.

Finance team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the finance team assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which the valuations should be classified.

Significant valuation issues are reported to the Board.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices [unadjusted] in active markets for identical assets or liabilities.

# Notes to the Condensed Interim Consolidated Financial Statements (Unaudited)

For the six months period ended 31 December 2019

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

### 3.4 Standards, interpretations and amendments to published approved accounting standards that are not yet effective

The following International Financial Reporting Standards (IFRS Standards) as notified under the Companies Act, 2017 and the amendments and interpretations thereto will be effective for accounting periods beginning on or after 01 January 2020 :

- Amendments to IFRS 3: Business Combinations	[effective 01 January 2020]
- Amendments to IAS 1: Presentation of Financial Statements	[effective 01 January 2020]

- Amendments to IFRS 9: Financial instruments	[effective 01 January 2020]
- Amendments to revised conceptual framework	[effective 01 January 2020]

The above amendments are not likely to have an impact on the Group's interim consolidated financial statements.
